

I am vehemently opposed to adding COVID as an excuse, in perpetuity, for an absentee ballot. This is beyond ridiculous and I hope the majority of the people of this state see through this ruse and demand that our legislators follow state law and our state Constitution. COVID is no longer an emergency, it is a virus and it is absolutely no reason not to vote in person. If there is anyone who really wants elected representatives to truly represent us, they better get to the polls in person and vote. Two and half years of this nonsense is two years too long. And stop the mass mailing for absentee ballot applications. It is a terrible waste of our money and completely unnecessary. People can request an application if they need one. Stop throwing our money away for the good of no one except yourselves.
